

Institutional Distinctiveness

We, at Govind National College Narangwal, have always strived to live up to the expectations and standards set for us by the founder of the Institution. Being a primary rural educational institute, we have always considered it a top priority to provide quality education to students of rural areas. The institution has always tried its best to cater to the needs of students who reach out to us from varied backgrounds. We understand the immense responsibility that rests on our shoulders of reaching out to underprivileged sections of surrounding areas so that they have access to good education. Our vision is to empower the rural youth and help them achieve excellence in various fields and prepare them to face global challenges. We have always aimed to inspire students to become responsible citizens by inculcating in them ethical and moral values and teaching them the value of social responsibility. We have always worked to create a positive impact and leave a positive imprint on the marginalised sections of the society. Academic excellence has been always our vision along with overall personality development of students so that we churn out global citizens with high adaptive skills in an ever changing and challenging global environment.

Another distinct feature of our institution has been promotion of sports. We offer courses which exclusively contribute to the needs of budding sports persons. We are proud of providing a conducive environment to the overall development of budding sports persons. We polish their talents with the right coaching and provide the platform they need to launch their careers in their respective fields. The Institution has contributed to the treasure trove of renowned sports personalities at national as well as international level. We are proud of our achievements in the field of sports and would continue to work towards excellence in this field as well.
